LB 605

Environment. I'm going to pull that committee (sic), because in talking with Todd Schneller (phonetic), they're going to develop something, and they have the money to do it. The other amendment would deal with money out of the EPIC Fund to the tune of \$100,000 annually that the Governor could use in missions to other areas of this country to promote the use of ethanol. As you know, California has the possibility, we don't know where we're at there, of increased use of ethanol for clean air and environment uses. And I understand there's also adequate money for that out of the Ethanol Fund. So, with that explanation of what these two amendments will, I would ask you to pull, not only this one, but the next one that is coming up.
